

Amphi II

Large-Format Plastic ID Card Printing

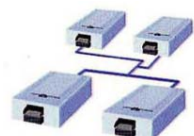

TransTech and HiTouch have partnered to bring you an exclusive new product, the Amphi II. The Amphi II is a multi-functional printing station suitable for all types of events. This Dye-Sublimation Hi-Touch printer personalizes and prints high quality cards efficiently. With room for expansion, the Amphi II can easily be integrated into any event, large or small, creating 4" x 7" badges that can quickly be recognized for ultimate security.

Event ID Cards

Ultimate Event ID Card Solution

The Amphi II can easily integrate into an event administration system to produce and print ID Cards. Create personalized cards with easy visibility for sporting events, concerts, and high-security events. Make your event as secure as possible with cards that are different colors, have large photographs and even barcodes. The large format with bold colors makes it easy to spot false identification.

Intelligent Multi-Task Printing Function

Excellent Expansion Capability - Satisfy Your Future Demand

The Amphi II comes with excellent expansion capabilities. When a single Amphi II cannot produce the required volume for a specific event, up to eight Amphi II's can be connected to a single PC. The Amphi II driver supports multiple printers when the Intelligent Multi-Task Printing Function is activated. In this mode, the driver will automatically allocate printing jobs to any idling Amphi II printer for faster production.

Custom Stock

Add to the security of your cards with custom printed cards from DSS. You can add high security features such as UV resistance, holograms, foils, micro-printing, prisms and other features. Contact TransTech Systems for more information.

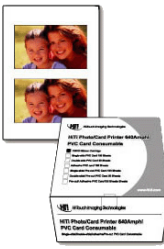

Custom Pre-Printed Badge
