

Super-size your security

1. Send us your logo
2. We program it onto a HoloKote Custom Key
3. You print ID cards with a full-size, secure HoloKote watermark. It's that simple!

New HoloKote FLEX full-sized visual security

- HoloKote Flex imprints a logo watermark of any size and location on the card.
- Printed by your Magicard Rio 2e or Tango 2e printer.
- For a modest set-up fee and no extra ongoing printing cost, print as many cards as you like with your HoloKote Flex design.
- Compared to custom holographic laminates, it's a mere fraction of the cost, and available in days, not months.
- HoloKote Flex is customized to your design, and delivered on an encrypted memory card for total security.

Now nobody can copy your cards.

HoloKote and HoloKote FLEX™

HoloKote is an anti-counterfeit custom watermark logo that is imprinted on the cards surface during the normal print cycle. 'HoloKote' uses a fixed 6x4 grid pattern whereas HoloKote FLEX is... flexible! You can have your logo at any size and location across the card!

For added visual security HoloPatch cards can be used with HoloKote and HoloKote FLEX. HoloPatch cards feature a gold patch that highlights the HoloKote or HoloKote FLEX watermark for maximum visibility. The diagrams below illustrate the visual differences and impact each option can create.

HoloKote data is securely stored on a Custom Key, an encrypted memory card which cannot be copied. In addition the HoloKote Custom Key can also be setup as a locking device for your printer.
