

ID Flow

Innovative Photo ID Card Software

ID Flow is Jolly Technologies innovative ID software solution for the management and printing of secure ID cards for small businesses to large enterprises.

Incorporating an advanced information management platform, database connectivity, design and automation tools; ID Flow offers more productivity and flexibility to users than any other solution available in the market.

Intelligent Database Configuration

- Select one of the pre-configured databases or easily connect to your existing database
- No need to re-enter or import data making setup quick and easy
- Customize the data entry screen with drag-and-drop tools. Field order auto-adjusts on the fly
- Double click on fields to define change the look and feel
- Create drop-down boxes for easy data entry
- Save searches for fast database queries and batch printing
- Include conditional objects to automatically change the card design based on record data

The ID Flow Advantage

Getting Started Is Easy

Get up and running in a matter of a few minutes with the step-by-step guided setup wizard or choose from a wide variety of samples.

Seamless Integration

Directly connect to any existing database via a live connection and integrate with existing ERP, HR, and Access Control databases without any importing, exporting or mapping of data. Print cards in the background from a third party or web application using the command line utility.

Configurable Database Layout

Improve productivity with efficient design and layout tools, autoconfigured data entry, flexible information navigation and search tools, batch printing and real-time database updates.

Unmatched Graphic Design

Utilize precise positioning tools, advanced graphics styles and effects and unmatched data formatting & layout tools together with powerful barcode rendering options to produce high quality photo ID cards.

Exact color matching and flexible image background removal utilities are included. Add design layers with database print conditions and opacity options to automate card printing and dramatically increase print accuracy.

Enhanced Security

Protect designs with passwords, specify access rights for each design, and define user roles to make printing and data management secure.

ID Flow

Specifications

Databases

Microsoft Access
Microsoft SQL Server
Microsoft Excel
Microsoft Visual FoxPro
Oracle
Sybase
MySQL
dBase
Includes Sample Database
ODBC / OLE DB Compliant

Barcodes

Code 39
Code 128
Codabar
PDF417 (2D)
DataMatrix (2D)
Many More

Image Types

BMP
GIF
JPEG
TIFF
Photoshop
PNG
PCX
WMF
Many More

Printers

Zebra / Eltron
Fargo
Datacard
UltraMagcard
DNP
Nisca
Evolis
HiTouch
EDI Secure
Dymo
Laser and Inkjet Desktop Printers

Devices

Cameras and Webcams (TWAIN / WIA)
ScanShell 800
ScanShell 1000
SnapShell
Topaz Signature Pads
Integrision Signature Pads

Templates

CR-80, CR-50, CR-79, CR-90, CR-100
2500+ Avery and Other Paper Badges

System Requirements

Microsoft Windows
2000/XP/2003/Vista
Pentium III 600 Mhz
256 MB RAM
100 MB Free Disk Space

Feature Highlights

- Design cards using powerful graphics and layout tools
- Add text, graphics, photos, 1D and 2D barcode, magnetic stripes, watermarks and a lot more to the card design
- Link the card design to any database, file based, server based, LAN / WAN, or ODBC / OLE DB in real-time
- Add, delete and modify database information using the integrated database editor
- Customize data entry screen with drag and drop tools
- Create smart drop-down lists
- Capture photos from any TWAIN / WIA compatible camera and improve image quality using the integrated image editor
- Filter, format, and preview database information before card printing
- Print UV layers for added security
- Encode SmartChips and Contactless cards
- Create and save a library of custom database filters
- Conditionally print card design elements by setting print conditions
- Design multiple card layouts within one template using conditional layers. Automatically print appropriate card based upon database criteria
- Search easily for specific cardholder information from thousands of records
- Batch print groups of cards using a simple selection tool
- Add, manage and print ID cards using a simplified card production-only operator interface
- Background print from 3rd party applications and web sites via the Command Line utility with optional XML interface

Available in Three Editions

- Enterprise
- Corporate
- Small Business
