

## ESSENTIAL TOOLS FOR YOUR START-UP ID PROGRAM

### The industry's best-selling ID software family

The Datacard ID Works software family creates a sensible migration path from Basic Edition to more advanced packages, including Standard Edition and Enterprise Edition. As your ID program evolves, you can upgrade to these packages to take advantage of new features, SDK support and a broader selection of compatible databases, card printers and input devices.

Datacard® ID Works® Basic identification software makes it easy for start-up ID programs to take advantage of the industry's most powerful, flexible and user-friendly family of ID software. It includes the core tools you need to manage any program efficiently, yet it is easy to upgrade if your needs change.

- **Powerful ID program management.** ID Works Basic software enables you to create card and report designs, as well as manage image capture and printing. You can enter and retrieve data from Microsoft® Access databases, and encode magnetic stripes and bar codes. You can also create your own layout, field labels, color and graphics in production forms.
- **Easy integration.** ID Works Basic software leverages the advanced features of the Datacard® SP Series and Magna™ Platinum™ Series card printers, and integrates seamlessly with many other card and paper printers. It is compatible with the Datacard® Tru™ Photo solution and CS-100 image capture system, as well as TWAIN or Video for Windows image capture devices.
- **Intuitive interface.** Basic Edition software simplifies ID program management with a user-friendly interface. Its intuitive point-and-click navigation makes card design and production easy. Customizable sample templates and fully integrated online documentation turn new users into experts in no time.

- Text field masking

#### Database management

- Auto-create Microsoft® Access 2000 database

#### Database support

- Microsoft Access 2000
- Microsoft Access 2002
- Microsoft Access 2003

#### Help features

- Online user's guide
- Online help
- Help desk support

#### Security features

- USB hardware key
- Application- or activity-level user security
- Login timeout feature
- Restrict project access by user
- Secure user audit trail

#### Compatible Datacard card printers

- SP Series card printer
- Select™ Platinum™ Series card printer
- Magna™ Platinum™ Series card printer
- ImageCard® IV card printer
- 150i card personalization system\*
- 275/280P/295 card personalization systems\*

#### Image capture options

- File input
- CS-100
- Datacard Tru Photo solution
- Datacard Tru Photo professional solution
- Datacard Tru Fingerprint solution
- TWAIN capture devices
- Video for Windows capture devices

### System Requirements

#### Operating system

- Microsoft® Windows® 2000 Professional
- Windows XP Professional or Home Edition
- (Installing the latest service pack is recommended)

#### Web browser

- Internet Explorer v5.01 or later

#### Processor

- 500 MHz Pentium® processor
- (1.5 GHz Pentium 4 recommended)

#### Memory

- 128 MB RAM (256 MB recommended)
- 100 MB hard disk space for application (not including database)
- 10 MB hard disk space on drive C for installation of sample database and sample photos
- 15 MB hard disk space for Adobe® Acrobat® Reader® (if not already installed)

#### Color

- 16-bit color (65,536 colors)
- (Cameras may require higher color)

#### Resolution

- 800 x 600 screen resolution
- (1024 x 768 recommended)

#### Peripherals

- CD-ROM drive
- Available USB port
